POWER BI | USED CAR MARKET ANALYSIS

Car Sales Dashboard

Pricing, revenue and market value across 548K sales

Mohamed Riduvan Azber

Three questions this dashboard answers

Who

Which brands earn the most revenue?

How much

How do selling prices compare to market value?

When

Which months were strongest for sales?

From raw data to dashboard

01

Clean

Power Query: blanks, text, dates, body groups.

02

Model

Sales table linked to a Date table.

03

Measure

DAX: revenue, units, price gap, % above market.

04

Visualize

KPIs, trends, rankings and slicers.

$7.51bn
Total revenue

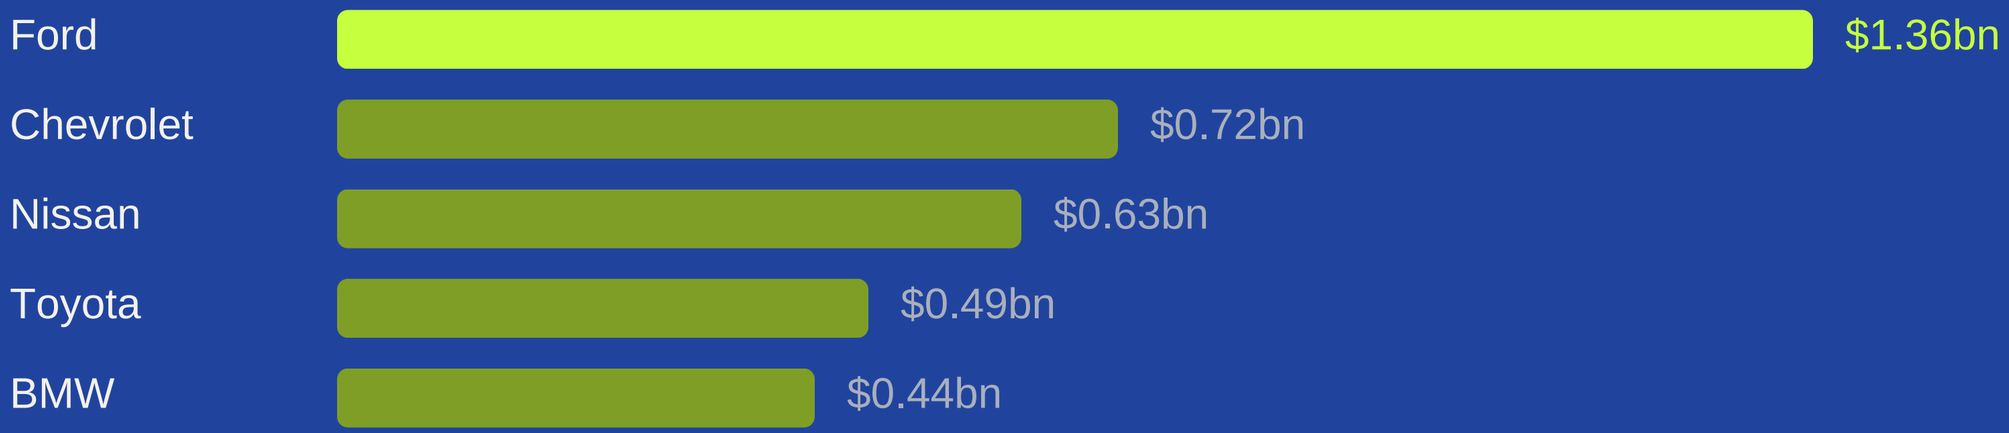

548K
Units sold

$13.69K
Average price

47% of cars sold above market value

Ford leads revenue at $1.36bn

Three takeaways

47%

of cars sold above market value, a sign of healthy demand.

Jan-Feb

2015 was the peak, with a dip in April and a second rise in June.

Ford

leads revenue, ahead of Chevrolet and Nissan.

06 | WHAT'S NEXT

Where I take this next

- Forecast future sales
- Add more years of data

Thank you | Mohamed Riduvan Azber
